1.4 Instead of showing a proper error message, backend error is showing for the existing email id- **VERIFIED**

```
IntegrityError
sqlalchemy.exc.IntegrityError: (psycopg2.errors.UniqueViolation) duplicate key value violates unique constraint "users_email_key"
DETAIL:  Key (email)=(user@gmail.com) already exists.

[SQL: INSERT INTO users (login_id, name, email, phone, age, about_me, profile_picture, created_at, college_name) VALUES (%(login_id)s, %(name)s, %(email)s, %(phone)s, %(age)s, %(about_me)s, %(profile_picture)s, %(created_at)s, %(college_name)s) RETURNING users.id]
[parameters: {'login_id': 7, 'name': 'user', 'email': 'user@gmail.com', 'phone': None, 'age': None, 'about_me': None, 'profile_picture': None, 'created_at': datetime.datetime(2025, 3, 19, 9, 35, 257317), 'college_name': None}]
(Background on this error at: https://sqlalche.me/e/20/gkpy)

Traceback (most recent call last):
  File "home\mbett\local\lib\python3.10\site-packages\sqlalchemy\engine\base.py", line 1964, in _exec_single_context
    self.dialect.do_execute(
  File "home\mbett\local\lib\python3.10\site-packages\sqlalchemy\engine\default.py", line 942, in do_execute
    cursor.execute(statement, parameters)

The above exception was the direct cause of the following exception:
```

1.5 User can submit the Signup form with an invalid email format- VERIFIED

Suggested Improvement

1. Unclear phrasing-- **VERIFIED**

Error message include '@domain.com'

2. Password Visibility Toggle is missing- **VERIFIED**

3. Inconsistency in the UI: Role field and Sign Up button, follow same styling in all elements- **VERIFIED**

4. Instead of Label Role, use User Account Type / Profile Type

5. Don't show 'admin' in the Role drop down- **VERIFIED**

1. Create Account >>

1.1 Removing the error message as soon as the user starts typing

1.2. 'Show Password' label should be in single line

1.3. Expected Result: The success message should be displayed immediately after successful submission, then only redirects to the login page.

But here, the application redirects to the login page immediately after submission, without displaying the success message. Success message is only displayed when the user navigates back to the signup page, not immediately after submission.

Create an Account

Signup successful! Please log in.

Username

Password

☐ Show Password

1.4 The password character length requirement should be displayed **before submission**, either:

- As a hint or placeholder text in the password field (e.g., "Password must be at least 8 characters").
- In real-time as the user types (eg. displaying a checkmark or as or error message dynamically)

Create an Account

Password must be at least 8 characters long.

Password

☐ Show Password

2.Login>>

2.1 Ensure the login page aligns with the overall design and branding of the application

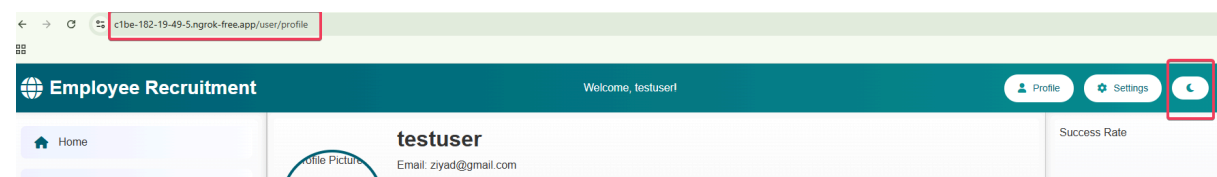

2.2 Inconsistency in the UI: Credential fields and 'Login' button, follow same styling in all elements

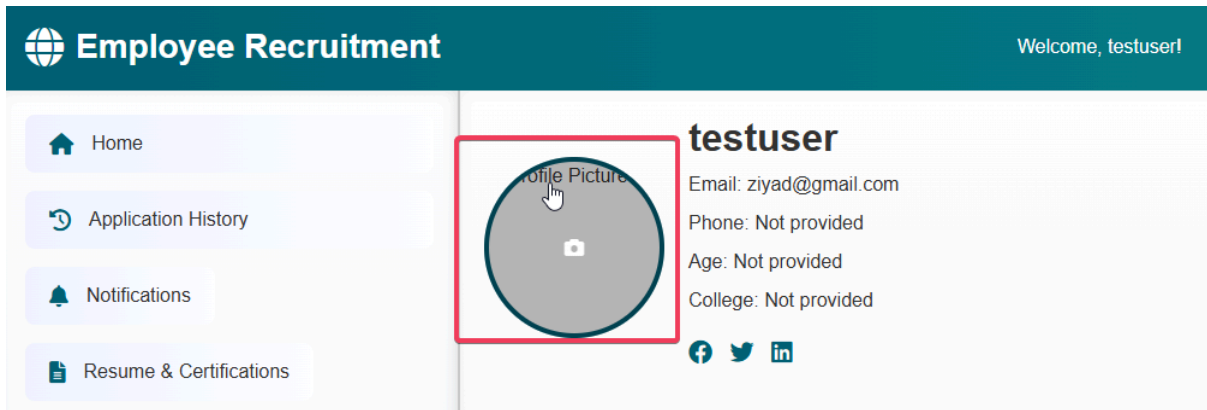

A login form mockup with a teal header. The form contains two input fields: 'Username' and 'Password'. Below the password field is a teal 'Login' button, which is highlighted with a red rectangular border. Below the button is the text 'Don't have an account? [Sign up](#)'.

3. Registered user >>

3.1 **Profile:** Unclear purpose of clickable icon on dashboard

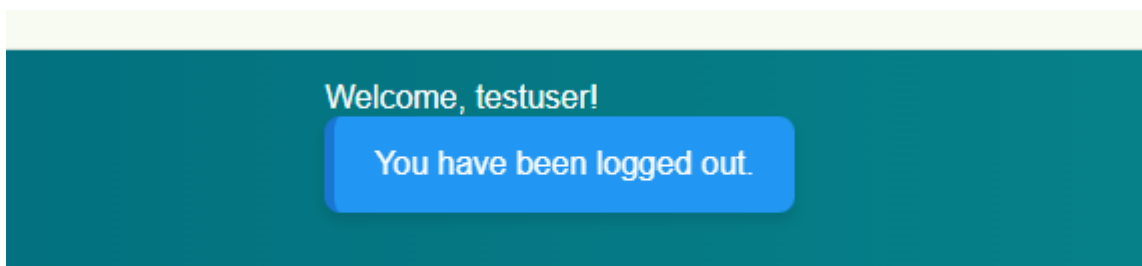

3.2 **Profile:**Unclear text in the Profile Upload area

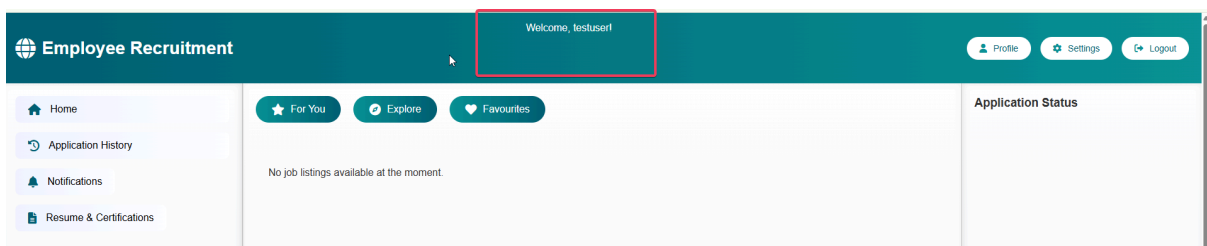

3.3 The logout confirmation message is not displayed immediately after the user logs out. Instead, it appears only when the user logs in again, and breaks the design of the "Welcome, [username]" message in the heading area.

Expected Result: The logout confirmation message should be displayed immediately after the user clicks the 'Logout' button.

Design breaks

3.4 Uploaded profile image is not showing, and the application displays an "Image updating" message instead of an "Image uploading" message.

Suggestion :

- 1. Clearly mark mandatory fields with an asterisk (*), because hovering over a field is not the most user-friendly approach**
- 2. Please make the 'Welcome {username}' message text larger in the page heading**
- 3. Toast message should disappears automatically after 2-3 seconds**
